

TBGP PORTAL

Transaction Monitoring Process Flow

How a client inquiry moves through the portal — from intake to quotation, order or project delivery, commission, payout, and the controls that keep it confidential and traceable.

CONTENTS

1	End-to-end overview	page 2
2	Inquiry intake and ProF credit	page 3
3	Product transaction flow	page 4
4	Project flow	page 5
5	Commission and payout flow	page 6
6	Notifications, alerts, and dashboards	page 7
7	Contractors, suppliers, and field members	page 8
8	Controls: suspensions and the audit trail	page 9
9	Quick reference guide	page 10

HOW TO READ THE DIAGRAMS

1. End-to-End Overview

Every client inquiry becomes one transaction with a reference number, an owner, a status, and a permanent history. Products and projects share the same engine; projects add the delivery panel.

Throughout: every change, follow-up, and file goes to the transaction history · Needs attention alerts flag idle, stuck, or overdue work · duty dashboards show each person's queue · contractors and suppliers see only what is shared with them · the audit log records who did what, from where, and the old → new values · client and project details stay confidential (Memorandum Order TBGP-51026-1).

2. Inquiry Intake and ProF Credit

Four ways a transaction enters the portal. Each ends in one transaction record; web inquiries credit the referring member (ProF) only through a valid share link and only if that member is not suspended from ads.

A · MARKETPLACE INQUIRY (products, services, real property)

B · PROJECT INQUIRY

C · OFFLINE INQUIRY (phone, walk-in, chat)

D · EXCEL IMPORT (Admin)

3. Product Transaction Flow

Each status shows the duty that works it. The account officer owns the transaction from first contact to closing; sourcing, pricing, and logistics take their stage; the supplier and sales agent feed in from their portals.

ALONG THE WAY

Supplier portal (My Orders)
sees orders assigned to its company and shared files · sends updates · uploads quotation, invoice, DR, proof of delivery → history, team sees New

Sales agent (My Assignments)
client notes and files (never supplier quotations or invoices) · Suggest a status change → the account officer applies it

On hold pauses any open status. **Needs attention:** no account officer after 1 day, no update 5 days, same status 10 days, quotation unanswered 3 days, late delivery, no logistics

4. Project Flow

The Projects Manager staffs each project; the coordinator owns it from inquiry to turnover. After the client accepts, Staff or Admin pick a registered contractor (there is no bidding) and delivery is tracked on the Project delivery panel.

ALONG THE WAY

5. Commission and Payout Flow

Inquiries never post commission by themselves. Project commission comes from client payments recorded on the project; product commission is encoded by Admin after a closed sale. Both land in member ledgers, which feed the payout chain.

A · PROJECT COMMISSION

B · PRODUCTS COMMISSION

C · PAYOUT

Two mechanisms keep work moving: the unread loop puts new activity in front of the right people, and the Needs attention rules catch transactions nobody touched. Duty dashboards show each person's queue.

THE UNREAD LOOP

NEEDS ATTENTION RULES (open transactions)

Rule	Products	Projects
Nobody owns it	No account officer after 1 day	Filter No coordinator
No update	More than 5 days	More than 7 days
Same status	More than 10 days (On hold, Quotation submitted excluded)	More than 14 days (On hold excluded)
Quotation waiting	Submitted more than 3 days ago, no answer	—
Dates passed	Scheduled delivery before Delivered; client target date	Stage target not reached; payment due; site visit not done
Missing people	Confirmed order without logistics coordinator or delivery date	Projects Manager card: no estimator / site engineer

WHERE IT SHOWS

Signal	Who	Content
Needs attention tile	Admin, Staff	Products and Projects lists filter to flagged rows with the reasons
Projects needing attention	Admin, Staff	Dashboard card: most urgent projects and why
Site visits & meetings	Admin, Staff	Next 7 days plus past schedules not marked done
Project duty cards	Duty holders	Team workload · My projects · My quotation queue · My sites
Product duty cards	Duty holders	Team workload · My accounts · sourcing · pricing · deliveries · product leads
Contractor / supplier card	Their users	Active work, reports due, late deliveries, upcoming visits
Notices / Suspensions	Everyone / Staff	Unread memos and policies · active suspensions count

7. Contractors, Suppliers, and Field Members

Outside the office, four kinds of users work on transactions through their own pages. Everything they post lands in the transaction history and alerts the team; status changes always stay with TBGP staff.

Participant	Sees	Never sees
Contractor	Projects assigned to its company: scope, shared files, stage targets, schedules, own progress and uploads	Client contacts, internal notes and files, contract, payments
Supplier	Orders assigned to its company: quantity, specs, shared files (e.g. PO), delivery date	Client contacts, internal files, TBGP pricing
Field agent	Projects where they hold a team slot: client contact, team, stages, schedules, files	The signed contract and payment records
Sales agent	Product inquiries where they are the sales agent: client contact, team, client-facing files	Supplier quotations and supplier invoices (supplier costs)

8. Controls: Suspensions and the Audit Trail

Memorandum Order TBGP-51026-1: only approved TBGP ads may be posted, and client, location, and transaction details are confidential. Violations lead to suspension. Every action is traced in the audit log.

MEMBER SUSPENSION

AUDIT TRAIL

I WANT TO...

I want to...	Go to
See what is new for me	Dashboard, or the red badges on Transactions / Projects / My Assignments
Log a phone, walk-in, or chat inquiry	Transactions → tab → New transaction
Take a product inquiry	Open it → Take as account officer (list: Take)
Take a project	Open it → Coordinate this
Record a call or email	Open it → Log follow-up
Staff a product order	Product team → account officer, sourcing, pricing, logistics, sales agent
Staff a project	Project team → coordinator, estimator, site engineer
Assign the supplier / contractor	Product team → Supplier, or Project team → Contractor → Save
Schedule a delivery	Transaction → Follow-up → Scheduled delivery
Schedule a site visit or meeting	Project delivery → Site visits & meetings
Share a file with the supplier / contractor	Documents → tick Share with the supplier / contractor
Record a client payment	Contract & payments → Received → Post commission
Share project commission	Income Management → Generate Project Commission
Encode a closed product sale	Income Management → Products Commission (Admin)
Find stuck, late, or unowned work	Products / Projects → Needs attention tile
See all schedules	Project Calendar (Only mine for yours)
Report to management	Export Excel · Trends & Analysis → Projects
Give someone a duty or link a company	Administration → Admin Options → Manage Users (Admin)
Suspend a member	Suspensions → Issue suspension (Admin)
Find who changed a record	Administration → Audit Log (SiteAdmin: Site Content → Audit Log)
Approve a payout	Payouts → Payout Queue (Admin approves; Staff submits release)

GOLDEN RULES

One owner per transaction, taken the day it arrives · **Status follows reality** — change it when the step happens · **Log every contact** · **Action needed** is a dated next step · **Share deliberately**; supplier costs and contracts stay internal · **Never post** client, location, or transaction details · **History and the audit log are permanent** — correct by a new update.

STATUS ORDER

Products	Projects
New inquiry	New inquiry
For research	For research
For costing / quotation	For costing / quotation
Quotation in process	Quotation in process
Quotation submitted	Quotation submitted
For follow-up	For follow-up
For assignment of contractor	For assignment of contractor
PO / order confirmed	Awarded / contract signed
For delivery	Mobilization
Delivered	Ongoing implementation
—	For turnover
On hold	On hold
Completed	Completed
Dead / terminated	Dead / terminated

NUMBERS TO REMEMBER

Item	Value
Product alerts	No owner 1 day · no update 5 days · same status 10 days · quotation unanswered 3 days
Project alerts	No update 7 days · same status 14 days · schedules look ahead 7 days
Project commission	Default 5% of each client payment → ProF 50% · contractor referrer 25% · admin 25%
Products commission	Ref-Seller 8% · Ref-Buyer 12% · POP 10% · AD-Fund 5% · PLATFORM 65%
Share-link credit	About 30 days after the guest opens a member link
Suspension	Default 30 days, max 365; ads and/or endorsement
Files	Up to 10 MB, or paste a Google Drive / Dropbox link

WHO DOES WHAT

Duty	Owns
Products Manager / Projects Manager	Staffs every transaction; watches workload, unstaffed work, suggestions
Account officer (products)	Client contact to closing; moves the status
Sourcing / Pricing officer	Supplier prices and specs / costing and client quotation
Logistics coordinator	Scheduled delivery, DR, proof of delivery
Project coordinator	Project from inquiry to turnover; contract and payments
Estimator / Site engineer	Costing, BOQ, quotation / oculars, inspections, progress
Sales agent / field agent (members)	Field follow-up; notes, files, status suggestions
